

Solution Brief

Insight Connected Workforce Assessment

Embrace secure modern work styles

Business challenge

The modern workplace is a natural evolution of the work environment where employees had designated spaces and regular office hours. Today, multi-generational workers place ever-growing pressures on organisations to deliver flexible work styles and support personal devices and applications to work more productively. Ongoing business demands to increase productivity and cut costs also make it harder for employees to meet market expectations. Together, these trends are reshaping the workplace. We see the need to have a complete view of these technical challenges as a base for planning the transformation to a modern workplace.

Our solution

The Insight Connected Workforce Assessment provides a structured approach as a first and essential step to support your business in its journey to the modern workplace.

The assessment follows an iterative and agile method to gather and prepare requirements and review readiness. This information is then used to design a plan that enables that journey realistically. Experts from Insight will work with your technical, functional and commercial teams to build alignment, drive value and ensure desired outcomes are achieved in your business.

Our methodology

The Connected Workforce Assessment evaluates your current environment against our preferred reference architecture to run a state of the art modern workplace environment. Several modules are being addressed during this assessment, and its full strength comes from the end to end perspective we give, covering all essential challenges. The output is a high-level roadmap, and a recommendation on the requirements to run a fully integrated connected workplace environment.

Benefits

- Gain a critical understanding of your workplace needs
- Identify the characteristics of an ideal future state
- Map business requirements to Microsoft 365 capabilities
- Receive a customised and actionable roadmap
- Begin transforming teamwork across your organisation

There are five core modules in the assessment; each focused on a specific need:

Device and App Readiness Assessment

Running your environment on the latest operating system is essential to ensure a fully secure and reliable infrastructure. This module looks in-depth at your current installation and allows you to decide, based on clear metrics, how to adjust and eventually migrate your devices and applications.

Directory and Network Readiness Assessment

Updating and working in a cloud based environment requires a clear view of the set up and performance of the network. This module provides that insight into network bandwidth and allows Insight to use best practice for modern delivery without influencing network speeds. With modern peer to peer deployment, Quality of Service can be assured.

Office and LOB App Delivery Assessment

Moving to O365 requires a good understanding of the current environment to ensure that all files are migrated to SharePoint and OneDrive, thus enabling end-users to work from anywhere on any device. The assessment also checks line of business applications to ensure secure single sign-on and best end-user productivity.

User Files and Settings Assessment

This assessment ensures all data, local and on-prem, is assessed, and the best choices are made to migrate data to the cloud, enabling secure access and data loss prevention.

Security and Compliance Assessment

This assessment evaluates all current security solutions, finds every potential blocker and enables integration of the highest security levels, data loss prevention and protection against modern malware and viruses.

Why Insight?

Making work experiences consistent across platforms, securing sensitive data and connecting your workforce – it's a lot of complicated moving parts to consider while focusing on moving your business forward. The Insight Connected Workforce Assessment lays a solid foundation for your workplace transformation, allowing your employees to do more, wherever they work - in the office or on-the-go, on any device. We have the people, processes and experience to assess, design and create a roadmap for your connected workforce goals to help you get started quickly.

Insight knows Microsoft

Insight has been a prominent Microsoft partner for more than 25 years. We demonstrate our enduring commitment through unique service offerings, numerous certifications and awards, and impressive infrastructure to support service delivery and, ultimately, our clients.
