- Real-time stock availability
- Custom pricing and online quoting
- Standard, ad hoc and custom reporting

Manage purchasing with:

- Standard and custom reports
- Real-time order tracking
- Access to order and invoice history

Insight.com feature	Client benefit
Access to real-time pricing & availability	Self-service tool for simplified shopping and buying
User flexibility	Unique user profiles with varying levels of access to products and tools
Catalogue customisation	Catalogue content limited based on client's corporate standards (Structure rules based on manufacturer, category, category attributes or individual part numbers.)
Company standards	Standards and catalogues configured by business unit, job role or user profile (Integration into lifecycle services is available through the standards tools.)
Approval workflow	Accelerate the ordering process by incorporating custom approval rules tailored to your organisation to guarantee approved purchasing standards.
SmartTracker	Customised checkout to streamline buying and contain costs
Reporting	Full suite of standard or custom reports available in real time or on a client-defined schedule
Software license agreements	Help ensure on-contract buying
E-procurement integration	Expansive system integration experience to directly interface with client systems (e.g., Ariba, Oracle, SAP)

We're here for you.

Our team of highly trained technology experts is always available to help you navigate the purchasing process and answer any questions you may have.
