

# Hybrid Cloud Migration Service

for Microsoft Azure

Insight's Hybrid Cloud Migration Service – Azure (HCM-A) helps you move to Azure with confidence and assurance.

It is a unique, high-level service delivered, by Insight experts whose knowledge of Microsoft Azure will ensure you understand, choose and implement the right migration options for your current and future needs.

## Business challenge

Cloud Services are now an accepted part of many organisations IT Services. Deploying services strategically however, is not always as simple as it seems. While you might be ready to migrate to Azure, finding the time and specialist resources to rigorously assess cost-control, security compliance, availability and performance is difficult. Designing a successful migration plan requires experienced professionals to ensure you select the right workloads, understand dependencies and relationships, and identify required changes.

## Our solution

Insight's Migration Service for Azure help organisations with the complexities of migration. Our experts support you with planned and confident move to Azure. We use proven and agile methodologies, tailored to your individual needs.

## Our service

Our Service is available at Standard and Advanced levels, ensuring the overall design, plan and migration aligns with your business needs.

The Standard level is focused on smaller, simpler migrations; while the Advanced level is applicable for complex or larger-scale workloads.

In both instances we cover architecture and build services for Azure foundations.

## Key benefits

- Enables assured, controlled migration to Azure, with minimal security, costs or performance risks
- Delivered by highly experienced cloud solutions architects
- Offers options to extend and tailor the service using Insight's portfolio of 'add-on' modules

## Why Insight

We are the partner to manage today and transform tomorrow

### Manage

- Efficiency
- Scalability
- Dependability
